# ABOUT THE 'SERIOUS APE' SERIES

Highly intelligent, to no one's surprise, might have been how most people would describe apes. Their intelligence level has never failed to inspire artists, musicians and Hollywood directors, etc. This time, our smart primal friends have been portrayed by Canada's beloved abstract artist in his most inimitable signature style. With primed ruby background symbolizing an ultimate sense of enthusiasm and positivity, diverse apes who were even precisely named are to be appreciated on the canvas. Every expression was meticulously drawn on account of Peter's profound imagination: "Apes are so intelligent and their cognitive connections with humans touched me!"

Unveiled for the very first time on the VIP Grand Opening Night of Peter Triantos's flagship gallery located at 21 Avenue Rd, in the heart of Yorkville, this quirky series has immediately captivated more than 600 spectators who were present and received numerous orders. What's even more noteworthy is that this series marks how Peter's innovative vision has soon taken over the world of NFT! This intriguing series is a perfect amalgamation of ideas, technologies and innovations. Inspired by nature, enhanced for the digital world, Peter's ambition to celebrate how NFT has changed the world of art is monumental! You are invited to appreciate and purchase this series on OpenSea, world's largest NFT marketplace.

No matter whether you endeavour to collect the original hand-embellished piece perfected by subtle epoxy or claim your ownership of its NFT versions, this new series will irrefutably redefine your new perspectives of abstract art today!

Perfected by the internationally acclaimed artist's most beloved signature, the "Jelly Bean" series, this magical portrait demonstrates a true sense of new playfulness. Revived by Peter Triantos' profound imagination, Marilyn Monroe becomes a mischievous pop culture icon.
